THE GIG FUND

Our fund is independent and student-run with over \$20,000 in AUM

- ✓ Comprised of 20 analysts, of varying experience levels, whom are selected by the committee through an application process.
 - Less experienced analysts are generally paired with more experienced analysts.
- ✓ The purpose of the Fund is to be educational, providing students with practical skills such as building financial models and pitch decks.
 - Analysts attend seminars and workshops to improve and enhance their pitches.
 - Our PSC+ program also offers students the opportunity to learn skills directly applicable to a career in financial services.
- ✓ While, in the past, the Fund has actively managed approximately \$20,000 (achieving a 30.4% return during the 2020-2021 academic year), the Fund's committee has altered the structure of the Fund.
 - With our new non-profit status, the Fund now features an investor relations team to raise money for an annual closed-end fund. Therefore, in place of our actively-managed fund, the annual closed-end fund — which terminates after three to five years — will be comprised of the stocks from the most promising pitches from across the year.

INVESTMENT BANKING CERTIFICATE

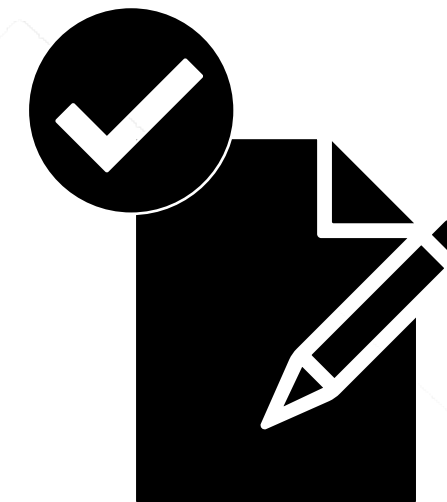

In line with its educational goals, the Global Investment Group offers the PSC+ in Investment Banking, which was developed in collaboration with the University's Careers Centre. The course is available to all members of the organization and aims to provide them with the necessary background to pursue a career in financial services. Additionally, students who complete the course requirements receive an official certification from the University that is displayed on their diploma.

Our PSC+ sessions include topics such as (but are not limited to) the following:

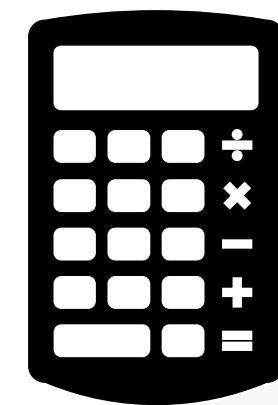

Excel Skills Workshop

- Relevant shortcuts and tools
- Graphing and charting skills

CV and Interview Workshop

- Designing and organizing a financial services-specific CV
- Interview skills and preparation

Financial Valuation Workshop

- Key valuation metrics and methods
- Introduction to DCF analysis

SPEAKER SERIES EVENT

Complementing the relevant skills taught through the PSC+ program is the insight provided by our speaker series.

- ✓ We aim to find speakers of varying levels of seniority and from across different sectors of the financial services industry.
 - Junior professionals provide insight into the hiring process and the day-to-day life of an analyst or associate.
 - Senior professionals expose members to a variety of possibilities by describing their own (often non-linear) experience in the industry, as well as answering questions that allow members to identify careers that best fit their interests and skills.

SPONSORSHIP

The Global Investment Group enables students to develop practical financial and investment skills, complementing the University education they receive. Since all of our investment gains have been reinvested into our portfolio, we seek your help to finance pre-professional and networking opportunities. Funding speakers, seminars, and visits to firms is integral to our organization; these experiences allow us to bridge the geographic gap between St Andrews and major financial centers. In addition to these events, we also intend to organize golf outings for visiting firms and industry professionals. Our first event of the 2022-2023 academic year will be a panel discussion featuring an investment banker, a private equity investor, and a financial advisor. This discussion will focus on entering the industry and further opportunities in each space. We are grateful for any support you can provide and look forward to hearing from you in the near future.
